Back: Charcoal

RW-103 Black
Back: Black

Recwater

Recwater fabrics are made of solution-dyed acrylic fibers with PVC coating on the underside, which makes them absolutely waterproof. The PVC coating is colored to match with the acrylic, thus, it is possible to combine the elegance of the acrylic fabric with PVC for 100% waterproof performance.

The color-matched PVC coating is formulated to achieve perfect adhesion with the acrylic fabric. Unlike other products on the market, **Recwater** does not crack or peel and has excellent dimensional stability.

The PVC-free acrylic fabric face is treated to achieve good water and oil repellency, while the coated side is embossed with a design that gives the PVC a fabric appearance.

Being a heavier and waterproof fabric makes **Recwater** suitable for boats in more extreme weather conditions.

It is also suitable for awnings and canopies in rainy climates. When using **Recwater**, the weight of the fabric should be taken into consideration when choosing hardware.

Technical Specifications

FABRIC TYPE

Base Fabric 50% Solution dyed acrylic fibers - 50% PVC

CHARACTERISTICS

Width	60" / 152 cm +/- 1%	Oil Repellency	≥ 5
Weight	19 oz. +/- 5%	Water Repellency	≥ 5
Standard Roll Length	65.6 yards / 60 meters	Styles	14 solids
Finish	Embossed PVC coating on under side	Limited Warranty	5 years
Water Column	100% waterproof		
Tensile Strength (warp/weft)	185/105 daN/5 cm +/- 5%		
Tear Strength (warp/weft)	4/2 daN/5 cm +/- 5%		

SAFETY, HEALTH AND ENVIRONMENT

UPF (Ultraviolet Protection Factor) 50+ (Excellent Protection) AS-NZS 4399

ADVANTAGES AND BENEFITS

	Fully waterproof		Textile look and feel		Printable fabrics		Suitable for marine environments		Easy to maintain		Energy saving		Cost saving		Stands the test of time
